EDUCATION

Bundelkhand University, Institute of Engineering and Technology
Bachelor of Technology in Computer Science & Engineering

2024 - 2028

Jhansi, Uttar Pradesh

Current CGPA: 7.77/10.00

TECHNICAL SKILLS

JavaScript, HTML, CSS, React.js, Node.js, Tailwind, Bootstrap, Express.js, MongoDB, MongoDB Atlas, MySQL, Git, GitHub, Docker, Kubernetes, REST APIs, Socket.io, Vite

RELEVANT COURSEWORK

Computer Science: Algorithms and Data Structures, Theory of Computation, Software Engineering and Design, Programming Languages & Techniques, Architecture, Discrete Mathematics, Operating Systems, Web Technologies, OOPS

PROJECTS

Bumart | Founder & Full-Stack Developer September 2026 – Present

- Founded and launched a full-stack campus marketplace for Bundelkhand University students to buy and sell second-hand items — live at bumart.vercel.app.
- Built with the MERN stack: React + Vite + Tailwind frontend, Node/Express + MongoDB backend.
- Real-time buyer–seller chat with Socket.io, plus offers, wishlist, reviews and notifications.
- JWT http-only cookie auth with bcrypt plus Google OAuth sign-in; Cloudinary image uploads.
- Deployed on Vercel (frontend) + Render (API), database on MongoDB Atlas.

DoctorResume | Class Project (Team of 4) — Backend September 2026

- Built a client-side ATS resume clinic in a team of 4: upload a resume (PDF/DOCX/TXT) and get an 8-point ATS health score with a medical-chart diagnosis — live at doctor-resume.vercel.app.
- Handled the backend logic — the resume parser and ATS scoring engine that preserve every section and bullet from the source resume.
- Generates an editable ATS-friendly rewrite with print-to-PDF output; everything runs in the browser, nothing is uploaded.

WanderLust | Full-Stack Web Application April 2026 – June 2026

- Built a full-stack travel listing platform using Node.js, Express.js, MongoDB, Mongoose, and EJS following the MVC architecture.
- Implemented CRUD operations, user authentication with Passport.js, reviews, and image uploads using Multer and Cloudinary.
- Built login and signup pages including user authentication and routing.
- Live demo: majorproject-7kxx.onrender.com/listings

Habit-Tracker | Web Application March 2026

- Developed a habit-tracking web application using HTML, CSS, and JavaScript with DOM manipulation and LocalStorage.
- Implemented habit creation and management, completion tracking, streaks, progress visualization, dark mode toggling and habit deletion.
- Live demo: harshit-exe-dev.github.io/Habit-Tracker/

LEADERSHIP & VOLUNTEER EXPERIENCE

Smart India Hackathon (SIH) | Team Member September 2025

- Collaborated on developing a solution for a real-world problem through team-based ideation and development.

GeeksforGeeks Campus Body | Volunteer | Bundelkhand University, Jhansi September 2025 – August 2026

- Planned and supported technical events and campus activities as a volunteer during 2025–2026.

IDEE Bootcamp (Phase II) – AICTE & MIC | Team Leader April 2026

- Led a team during a 5-day Innovation, Design & Entrepreneurship Bootcamp, focusing on ideation, design thinking, prototyping, and entrepreneurship.
- Completed an 18-hour intensive training by the Wadhvani Foundation, covering business modelling, idea and financial planning.
